

## *Eyes drop filling-capping machine HHGNX-I*

Mainly used to classical filling sealer series and suitable for filling and clamping caps for rounded and irregular bottles. This machine is composed of high precision cam provides a complete wheel, positioning, plug, cover, lifting cosine acceleration of cam drive mechanism to complete the capping head; adopts constant torque capping head screw cap; the peristaltic pump filling or ceramic pump metering filling; touch-screen computer controlled; has unique function of no bottle filling, no internal plug and no inner plug, optional RABS.

### **Technical Parameters:**

Bottles applicability	2-30ml
Output	<<70 bottles / minute (depending on the size of the bottle)
Power source	220V 50Hz
Air wastage	5m <sup>3</sup> /h, 0.5-0.6MPa
Power	1kw
Weight	600kg
Overall size	2000 x 1400 x 1600mm
