

LFID-20 High-Speed Pouch Desiccant Inserter

Desiccant inserter machine LFID-20 is specialized equipment designed to cut the desiccant sachet automatically and insert it into bottles, cartons, and bags which are filled with tablets, pills, capsules, or another solid medicament. It is designed for the industry of pharmaceutical, health care, and foodstuff, and other similar fields. Its compact structure and fine design allow for easy maintenance and conform to GMP standards equipped with Servo-driven and PLC control system with a touch screen offering easy and reliable operation.

Application

The inserter machine can be used separately or combined with a fully automatic unscrambler, automatic electric tablet/capsule counter, screw capper, electric-magnetic induction sealer, and labeler, etc. Equipment including desiccant inserter made by our company to form an integrated packaging line for plastic containers also can be incorporated with another similar packaging line.

Technical Parameter

Model	LFID-20
Max. speed	200 bottles/min
Air pressure	0.4-0.7Mpa
Air consumption	30/min
Power supply	AC460V 50/60Hz 400W
Dimension	610mm(L)×1677mm(W)×450mm(H)
Weight	160kg
