

CGN-208D Semi-automatic Capsule Filling Machine

This machine has separated empty capsule feeding station, powder feeding station and capsule closing station. The medium processes need to be operated by manual. The machine use three inverters to control the speed of capsule feeding turret, powder feeding turret and the powder feeding auger. All the operation is very easy and simple, can be filled the powder & granule material easily.

Features

The machine body and working table adopt stainless steel, and increased one assistant big feeding hopper, it's easy to connect to the vacuum feeder. The machine conforms to the sanitary requirement of pharmaceutical & nutrition industries. It's widely used for filling the powder & granule material in pharmaceutical & nutrition industries.

Technical Parameters

Application Capsule	#00, #0, #1, #2, #3, #4, #5
	Different size need different mold
Capacity	10,000-20,000 piece per hour
Dosage Type	Powder/Granule/Pellet
Power Supply	1P,220V,50/60Hz
	3P,380V,50/60Hz
	3P,220V,50/60Hz
Machine Size	1290x685x1600mm
Weight	330Kg
Packing Details	1800x1200x1700mm, Gross Weight:480K
