

Fully Automatic Positioning Labeling Machine CED-202

Automatic label applicators are machines that are used to automatically apply labels to products with high precision and efficiency. They are widely used in a variety of industries, including food and beverage, personal care, electronics, and logistics.

Introduction

CED-202 Automatic label applicators are sophisticated machines that are designed to automatically apply labels to products with high precision and efficiency. They are capable of handling a wide range of label types, including self-adhesive labels, thermal labels, and RFID tags, making them versatile for various labeling applications. Overall, automatic label applicators are an essential tool for manufacturers and distributors, enabling them to streamline their labeling processes, improve productivity, reduce labor costs, and ensure that their products are properly labeled and ready for sale or distribution.

Feature

- Wide applicability: suitable for round bottles and square bottles of 15-500ml, with a wide range of applications.
- High efficiency: The production capacity is 30-120 bottles/minute, and the labeling efficiency is high.
- Stable and reliable: Using well-known brand configurations, such as Delta servo motors, Schneider switching power supplies, etc., the system is stable and reliable.
- High degree of automation: It adopts touch screen human-machine interface, which is simple to operate and can automatically calculate the label length and gap.
- Convenient maintenance: Detailed troubleshooting instructions are provided to facilitate users to maintain and solve problems.
- Multifunctional: It has functions such as label position and gap adjustment, photoelectric eye position and sensitivity adjustment, etc. to adapt to different labeling needs.

- Easy to operate: A complete operation flow chart is provided to facilitate users to understand the entire operation process.
- Compact structure: small size, light weight, small footprint and compact structure.
- Simple maintenance: Maintenance precautions are provided to facilitate users to perform daily maintenance.
- High cost performance: complete functions, moderate price and high cost performance.

Specifications

Model	CED-202
Applicable bottle types:	15-500ml round and square bottles
Applicable label length:	<300mm, width <120mm
Production capacity:	30-120 bottles/minute
Power supply and power:	AC 220V 50Hz 0.15kw
Air supply:	0.6MPa
Dimensions:	2000×700×1650mm
Weight:	280kg
