

## *HM 1000 High-speed Optimized Blister Packaging Machine*

HM 1000 is a high-speed optimized blister packaging machine in intermittent motion with three lane mode of operation. This model is suitable for mass sized production, in which is capable of producing up to 1000 blisters per minute. HM 1000 offers high flexibility and efficiency while applying innovated technology with ergonomic design.

### **Features**

- Industrial standard PC control system
- High quality of forming through upgraded pre-heating system
- Intermittent platen sealing
- Self-adjust servo driven indexing system
- GMP compliant design

### **Specification**

Model	HM 1000
ouput	1000 bpm
sealing principle	Platen sealing
format range (width x index)	320 x 240 mm
