

**ZLCP-50P Automatic Powder Woven Bag Packaging Machine**

ZLCP-50P Automatic powder bag feeding packaging machine unit is specially suitable for powdery material, the packaging material is paper bag, PE bag, woven bag, the packing range is 10-50kg, the maximum speed can reach 3-8 bags/min. High efficiency, advanced design suitable for various requirements.

**Features**

1. The machine is easy operated and stable because of adopting Siemens PLC and 10 inch color touch screen in control part.
2. Pneumatic part adopts Festo solenoid, oil- water separator, and cylinder.
3. Vacuum system adopts Festo solenoid, filter, and digital vacuum pressure switch.
4. The magnetic switch and photoelectrical switch are provided in every movement mechanism, which is safe and reliable.

**Technical Data**

Packaging material	prefabricated woven bag (lined with PP/PE film)
Size of bag making	(700-1100mm)x(480-650mm) LXW
Measuring range	25-50KG
Measurement accuracy	±50G
Packaging speed	1-4bags/min (slight variation depending on the packaging material, bag size etc.)
Ambient temperature	-10°C~+45°C
Power	380V 50HZ 15Kw
Air Consumption	0.5~0.7MPa
External dimensions	5860x2500x4140mm (L x W x H)
Weight	1600kg
