

## Tube Filling Machines ASPRO MICRO

- ASPRO micro model tube filling machine is a rotary indexing turret model
- The machine runs at a speed up to 40 tubes / min according to the tube type
- Driven by Ferguson indexing system
- All the product contact parts are made of SS 316 L matching to pharma grade requirement
- Base frame is made of MS and covered with SS 304 side covers
- The volumetric dispensing pump is designed for easy dismantling and sanitization
- Ergonomically designed to occupy a minimal space
- Power consumption : 5.5 KW air consumption : 18 CFM @ 6 Bar pr
- Size of the Machine : 1600 mm x 1600 mm Machine is compatible to fix all optional accessories for fully automatic
- Basic machine will be fitted with lami tube sealing system
- Aluminium crimping device can be attached as optional reqmt at extra cost
- The machine can be linked up with our cartoning machine and bundlers
- No. of stations : 8. machine is fitted with SS covered top table
- Chill water circle to Be given by customer for better sealing finish

Model	ASPRO MICRO
Speed in Pcs/Min	Up to 40 *
No. of filling Heads	1
Contact Parts	SS316
Filling volume in ML	0-150

Tube Handling capacity-Dia in mm	12-50
Filling accuracy	±0.5%
Hopper capacity in Ltrs	30
Power required in KW	0.75
Blower in KW	0.37
Heater in KW	3.50
Air consumption in CFM	15
Dimension (LxBxH)	1450x750x2000
Weight (Approx.) in kgs	670
* Depends upon tube structure, product, fill volume, tube dia, etc
