

HM GM-G series Co-mill / Grinding Modification Machine

-safe, sanitary, easily control meshes of final granule

Usage: grind raw material; granulate wet material; modification dry material

Suitable: rough and lump, dry and wet raw material

Working principle: raw material world by rotary knife in conical chamber, centrifugal force material to sieve, rotary knife high speed shear sieve, grind material and discharge granule through sieve.

Range: output 6-80 meshes

Model: HM GM-G150/300/450/700/1000

Capacity: 15-150/30-300/45-450/70-700/100-1000 kgs/h
