

Inclined Conveyor

Applicable for lift-conveying of granular products, such as potato chips, candies, nuts, frozen food, green vegetable, chemical medicine, etc.

Main Function & Features:

1. The belt is made of food grade polypropylene (PP) material, free adjustment of belt length and width, good-looking, hard to deform and high and low temperature resistant.
2. Wide range of applications, long service life, various patterns of belt surface, sidewall and skirt for option.
3. Able to combine with other equipment to make a whole production line for continuous or intermittent automatic weighing and packaging.
4. Special belt material is necessary when lifting acid, alkaline, oily, organic solvent products or products with high temperature.
5. Variable frequency drive (VFD) to adjust conveying speed. Easy disassembly and maintenance. Convenient for cleaning.

Technical Parameters:

Contents	Specifications
Body Material	SUS304
Conveyor Type	belt / chain plate
Belt Material	PVC / PU / PP
Sidewall / Skirt Height	Sidewall: 50mm; Skirt: 75mm or per requirement
Power Supply	single / 3 phase 220V/380V 50HZ/60HZ, 1.1KW
Conveying Speed	0~20m/min
Conveyor Width(mm)	custom-made per requirement
Machine Dimension(mm)	custom-made per requirement
