

Automatic Plane Labeling Machine

Main features:

- ◆ The scope of products: pharmaceuticals, electronics, food, logistics, packaging, cosmetic and other industries
- ◆ Product intelligent integrated design, convenient and flexible; integrate a variety of input and output interfaces for production-line operation
- ◆ Using high-speed precision high torque stepper motor, labeling speeds up to 30 m / min.
- ◆ Constant torsion pendulum rod send standard clutch, high-speed constant tension to send standard, easy to improve labeling accuracy
- ◆ Constant speed winding device to prevent label backing roll into the feed roll and other defects label; and avoid the label backing paper recycling tight and difficult to remove the case
- ◆ PLC using Panasonic professional real-time control of the motor controller, the labeling process to achieve automatic correction function; higher labeling accuracy
- ◆ advanced man-machine interface control system, make operation simple and flexible
- ◆ Wheel design, easy to move to different occasions, quick adjustment, fully automatic labeling of any product

Adaptation product

Greeting cards, toothbrushes, box, carton, stationery, LED driver board, folders, plastic toys, wipes cover, blueberry boxes, caps, mirror cover, posted double-sided sponge rubber, disposable dishes, millet phone boxes, plastic parts, brushes, plastic sheets, jelly box sets, tea

Technical parameters: detailed parameters can be customized according to customer product scope

Labeling accuracy	±1mm (Excluding product label error)
Labeling speed	40~200Pcs / min (with the product, label size)
Applicable Size	long: 40mm~400mm width: 40mm~4500mm high: 0.2mm~5mm
Applicable Label Size	long: 6mm~150mm Width (backing paper width): 15mm~130mm
Machine size	about 1600mm×850mm×1400mm(L × W × H)
Power supply	220V/50HZ
Total Weight	about 180Kg3
