

Eyedrops Filling Capping Machine JT-SFC

Eyedrops liquid filling and rotating cap machine is a new product that our company developed and researched in recent years. Computer control wriggle pump to measure filling. It has many functions of auto adding inside, capping, rotating-cap, It is the new generation equipment of eye drop production of pharmaceutical industry. The machine can also be used to the production of filling, adding stopper, rotating cap and labeling small dosage liquid in other industry.

Technical parameter:

- Applied bottle range : 2-50ml
- Power supply : 220V 50Hz
- Power consumed : 1.2Kw
- Tolerance of filling error : $\leq \pm 1\%$
- Qualified ratio of rotating-cap : $\geq 99\%$
- Speed control : frequency conversion adjusting speed
- Required compressed air : quantity:0.4-0.6MPa
- Pressure : 25-35L/min
- Single machine noise : $\leq 70\text{dB}$
- Weight : 700Kg
- Overall dimension : 2080*960*1480 (mm)
- Production capacity:
- Single-head filling : 40-60 BPM
- Dual-head filling : 80-120 BPM
