

## *GBZ-130C Transparent Film Automatic Packaging Machine*

GBZ-130 Transparent film wrapping machine is designed according to the advanced features of foreign packaging equipments and integrating the situation of China. It adopts computer-controlled system in whole working flow, and gets the purpose of temperature controlling, seal cutting, transmission, feeding and automatic packaging. It adopts safe automatic protecting device. The main machine is equipped with frequency conversion to adjust and control accurately. GBZ-130 packing machine owns features of compact design, simple operating and convenient maintenance. It is the ideal packaging equipment for small carton transparent membrane packaging. It has not only improved the product grade and also increased the added value of the products, and expanded the market sale.

This wrapping machine can be used extensively suitable to transparent membrane packaging of small box, and be good at sealing, damp proof, and beauty performance.

Package: cigarette, poker, transparent soap, small medicine box, daily small commodity, electron, health products. Chemical products, medicine, etc.

### **Specifications:**

Packing material:	BOPP film, heat seal shrinking film
Packaging speed:	30-100 parcels/minute
Packaging size (mm):	Length 60-130, width 40-100, thickness 10-40
power source:	220V 50HZ
Total power:	3KW
Weight:	about 750Kg
Appearance size (mm):	2000x700x1450mm
