Suitable for Different Types of Material like Milk, Syrup, Juice, Honey, Sauce, Cleaning Products, Phenyl, Shampoo, Handwash, Glycerin, Solvent, Chemical, Lotion and relevant

Description:

The semi-automatic Digital liquid filling machine is single head very compact and lightweight construction, can be easily moved around. It is easy to operate just plug and play device. It is timer based machine.

Operation:

Bottles have to place manually below the filling nozzles at tray of machine. The filling range can be set from keypad directly. By giving start command the liquid dispenses from the nozzle. Once the set volume of liquid has been dispensed, the nozzle shuts off immediately in positive way and ensures zero dripping. This multi-function multi featured machine meets the custom requirements of filling of liquid material in glass, plastic and aluminum bottles and standing pouch.

Features:

- Unique table top machine suitable for small output
- Low Power Consumption
- Compact and versatile unit S.S. matt finished body
- Suitable for different shape and size containers
- Easy and accurate adjustments of fill desired quantity without the help of change parts
- Operation timing can be set as per user efficiency
- Reciprocating Filling Nozzle with self-centering device to avoid Foaming.
