

Aluminum Film Automatic Vacuum Packing Machine Double Side Stretch Wrapping CV-420L/520L

It is called double aluminum film vacuum packaging machine. Double stretch wrapping machine fill the blank of only one side stretch wrapping machine to satisfy the need of aluminum foil packaging products demand.

Scope:

Suitable for all kinds of leisure food: fish, tofu, beef, duchy tongue etc.

Control system:

The device adopts the PLC made in Japan Mitsubishi, color touch screen and so on. It has complete safety precautions.

Function:

- According to user requirements to be vacuum packing
- The machine adopts hard aluminum alloy and stainless steel materials, improves the corrosion resistance of the equipment
- Using combined die for convenient replacement. the mound with the water cooling function
- The stable performance, long service life of imported pneumatic components
- Vacuum pump adopt the germany made brand
- Photoelectric tracking double-sided printed on version.
- It could be equipped with automatic coding system
- It could be chooses with the square or round shape packing

Technical Parameter:

upper film width	495(395)mm
lower film width	523(423)mm
working room size	400*(300-400)mm
air consumption	0.6MPa 0.3m ³
vauum	-0.1Mpa
voltage	380V 50HZ
total power	13KWS
dimension	6500*1170(1070)*1700mm
the largest tensile strength	20mm
weight	2200kgs
