

APC-A160 Bottle Unscrambler

APC-A160 Bottle Unscrambler is equipped with quantity control system and overload protection device.

It is a machine with convenient operation, easy maintenance and steady performance.

The machine is made up of high-quality 304 stainless steel, easy to clean and sterilize. Meet with GMP standards.

Equipped with automatic anti-bottle mechanism and collecting bottle device, highly improve production efficiency.

Feature:

- The series filling machine is a kind of PLC controlled high-tech filling machine with photoelectric sensing and pneumatic actuating researched and developed by our company.
- It can be suitable for water injection, fluids, detergent products of different viscosity.
- Widely used in food, medicine, grease, pesticide, chemical and cosmetic industries.
- The machine can be conveniently maintained. It can realize accurate metering and make sure no filling is made in case of any bottle or bottle shortage.
- Bottle unscrambler is designed with submersible filling function, featured by accurate measurement and no bubble and dropping during the filling.
- Adopts electric components of world-famous brands. The main power cylinder adopts FESTO Germany dual-action cylinder and magnetic switch, Omron photoelectric and Germany SIEMENS PLC touch screen are equipped to ensure its excellent quality and stable performance.

Technical Parameters:

Name	Output	Power supply	Net dimensions	Weight
APC-A160 Bottle Unscrambler	20-300	220V/50HZ/0.15kw	1050*1150*1250	300
