

## *DFR-180A Box Film Wrapping Machine*

Suitable to piling up thin medicine box with many layers and rows with little kinds boxes, advanced technology, non-shrinking, save 9000W/hour, this machine is the choice instead of middle box in the field of medicines

### **Feature:**

- Boxes entering direction: length direction runs parallel with the inputting conveyor direction.
- Italian technology is adopted in the seal & cut part, clients could change the elements at choice. Melt-adhesive momentary heating, cut by steel knife
- No picture, smooth surface after being packed
- Wrapping equipments' space can be ordered according to practical ground, suitable for product line, conveniently adjustable specification
- Infinite speed variation, steady, reliable
- Controlled by PLC, updated software were freely provided all year around
- Low noise small floor space

### **Technical Parameter:**

- Packing speed: 10 b/p, Max15p/m
- Maximum packing size: 200\*160\*235mm
- Power: 350W
- Power Supply: AC 220V 50HZ
- Electric Current: 3.5A
- Air Pressure: 0.5-0.7Mpa
- Quantity of gas: 0.5-0.7m<sup>3</sup>/min
- Machine dimension: 1600\*640\*1650mm
- Weight: 300kg
