

## *Automatic Round Bottle Labeling Machine LG-802*

Round bottle labeling machine can label round products of different sizes, such as round bottles and cans.

The machine adopts the combination of electric cabinet, independent bottle device, conveying mechanism, roller label device, label machine, label brush device, operating system and control system to complete the labeling.

And compared with machines in the same industry, the price for sale is low. The round bottle after labeling is more exquisite and has good anti-counterfeiting function. Machine is the best choice for product labeling.

### **Main Features**

1. Automatic bottle labeling machine is equipped with a belt conveyor system. This system is consistent with international standards, stable and reliable, and can effectively ensure the delivery of materials.
2. The whole body of this machine is made of imported 304 stainless steel and aluminum alloy materials, which ensure the high quality of the machine, and the machine has a long life and a long life.
3. The whole machine adopts imported servo control system, which makes the operation of the machine more stable and improves the production efficiency.
4. Automatic bottle labeling machine is equipped with a belt printer device, which can print the production date and batch number online, reduce the machine stopping time during the bottle packaging process, and improve the production efficiency.
5. This machine adopts friendly human-machine interface touch screen control system with complete functions and online help function to make operation easier.
6. Round bottle labeling machine can make the quality of the machine more stable and reliable by using imported electrical components from world famous brands.

7. The automatic sensor of the machine can detect the label. If there is no label, the machine will stop automatically.
8. The conveying function and automatic marking of the machine can realize synchronous tracking, which can make the operation more quickly, effectively reduce the production time and improve the production efficiency.
9. Automatic bottle labeling machine has an optional receiving platform, which is very conducive to the collection and classification of finished products and greatly reduces the labor of workers.

#### Technical Data:

Model	LG-802
Application label length	30mm~300mm
Application Label width	30mm~210mm
Application label roll out diameter	φ280mm
Application label roll inner diameter	Φ76mm
Labeling Precision	±1-2mm
Labeling Speeding	40-100 bottles/min
Power	220v/0.98kw
Machine Dimension	2000*1100*1300
Weight	200kg
