

FF-F130 Automatic Round Bottle Labeling Machine

FF-F130 automatic round bottle labeling machine is applicable for labeling various round surfaces made of glass, plastics, metal and so on with accurate positions. The automatic round bottle labeling machine is desktop type and continuous labeling machine. It is cheaper than the floor automatic labeling machine and has high efficiency.

Application

It is suitable for labeling round bottles in pharmaceutical, food and daily chemical industries. It can be pasted all week and half circle. Automatic turntable bottle management machine can be selected, which can be directly connected to the front-end production line, and automatically send bottles into the labeling machine to increase efficiency. It can be equipped with color belt coding and labeling machine, which can print the production date and batch number online, reduce the bottle packaging process and improve the production efficiency.

Features

Wide range of application, it can meet the requirements of full circle labeling or semi circle labeling of round bottles. The label switching between bottles is simple and the adjustment is convenient.

The label overlap degree is high, and the tape detour adopts the deviation correction mechanism, the label belt does not deviate, the labeling position X / Y / Z three directions and the inclination degree are adjustable, there is no dead angle in the adjustment, and the label coincidence degree is high.

Excellent labeling quality, elastic label covering belt is adopted, and the label is flat without wrinkles, which improves the packaging quality.

Flexible application, vertical labeling of bottles, automatic bottle separation function, single machine production or assembly line production.

Intelligent control, automatic photoelectric tracking, with no label, no label automatic correction and label automatic detection function, to prevent missing and label waste.

High stability, advanced electronic control system composed of Panasonic PLC + Panasonic touch screen + Panasonic needle shaped electric eye + Germany Laoyi test label electric eye, supporting 7 × 24-hour operation of the equipment.

It is easy to adjust. The labeling speed, conveying speed and bottle dividing speed can be adjusted steplessly according to the needs.

The machine is solid and durable. It adopts three-bar adjusting mechanism and makes full use of the stability of triangle. It is made of stainless steel and high-grade aluminum alloy, which meets GMP production requirements.

Scope of application

Applicable label: self-adhesive label, self-adhesive film, electronic supervision code, bar code, etc.

Applicable products: products requiring labels or films on the circumference.

Application Industry: widely used in food, medicine, cosmetics, daily chemical, electronic, hardware, plastic and other industries.

Application examples: pet round bottle labeling, plastic bottle labeling, food can labeling, etc.

Technology data sheet:

Model	FF-F130
Voltage	110V/220V 50HZ/60HZ
Power	1500w
Labeling speed	20-40pcs/min
Capacity diameter	20mm-120mm
Label length	30-300mm OEM
Label width	20-150mm OEM
Label roll inner diameter	76mm
Maximum outside diameter	270mm
Printer with air	0.5pa
Machine size	1300mm*800mm*800mm
Net weight	180kgs
