

## Tube Filling And Sealing Machine

The filling and sealing machine adopts closed and semi-closed filling pastes and liquids. The sealing has no leakage, and the filling weight and volume are consistent. The filling, sealing and printing can be completed at one time. It is suitable for medicine, daily chemical, food, Product packaging in chemical and other fields. Such as: filling and sealing of materials such as Piyanping, ointment, hair dye, toothpaste, shoe polish, adhesive, AB glue, epoxy glue, neoprene and other materials. It is ideal, practical and economical filling equipment for the pharmaceutical, daily chemical, and fine chemical industries.

### Product Parameter:

Parameter	Value
Body	Stainless steel
Power supply	50 (60) HZ/220V
Air pressure	0.4-0.6Mpa
Main motor power	1.5KW
Heater power	3.3KW
Filling range	10-70ml, 20-140ml, 30-300ml
Hose length	80-220mm
Hose diameter	16-50mm
Filling speed	20-50 pcs/min
Filling accuracy	±1%
Equipment size	1335mm*960mm*1750mm
