

Automatic Three Labels Adhesive Sticker Labeling Machine

Front, back and neck three sides and wrap around labeling machine can apply three labels on round and square bottle. Labeling machine is used to apply labels to various products such as Ampoules, Vials, Bottles, Jars, Container, Canisters, Cartons, Boxes, Caps packages etc.

Specifications:

1. Can be applied to the round and square bottle labeling of industries such as pharmacy, food, daily chemical and the like.
2. Optional automatic rotary bottle uncrambler machine, can be directly connected to the front production line, automatic bottle feeding into the labeling machine, increase efficiency.
3. It can be equipped with ribbon printer machine, which can print production date and batch number on line, reduce the packaging process of bottle and improve production efficiency.

Technical Parameters:

Label length	10mm~300mm
Label width	10mm~150mm
Bottle diameter	20mm~φ100mm
Bottle height	20mm~250mm
Roll Label outer diameter	300mm~350mm
Roll Label inner diameter	70mm~75mm
Accuracy	±1mm
Label speed	30~120 pcs/min
Conveyor speed	5~25 m/min
Suitable label type	Adhesive sticker label (Transparent lable is available)
Working air pressure	0.4-0.6Mpa
Voltage	220VAC ±10 50HZ
Power	1500W
Weight	230KG
Overall dimension	2000mm×800mm×1500mm
