

BMD-210F Premade Pouch Machine with Mix Weighting Filling Sealing for Powder

The premade bag automatic packaging machine replaces manual packaging, and realizes packaging automation for large enterprises and small and medium-sized enterprises. The operator only needs to put the finished bags one by one, and put hundreds of bags in the bag removal department of the equipment at a time. The mechanical claw of the equipment will automatically take the bag, print the date, open the bag, give a signal to the measuring device, and blank, seal, and output.

Machinery Detail

1. Whole machinery run controlled by servo system, ensure machinery, run steady, precision and steady
2. Top brand international electric parts, get local service
3. The speed of this machine is adjusted by frequency conversion with the range, the actual speed depends on type of production and pouch size
4. Automatic checking system for bag situation, filling and sealing situation, mention you once
 1. no bag feeding,
 2. no filling and no sealing
 3. bag no open

Technical Parameters:

Model	BMD-210F
Working speed	15-45 bags/min(difference for more material)
Bag capacity	1-450g(base on difference goods)

Weight precision	±0.2g-3g(base on difference goods)
Control system	Full servo system with PLC touch screen
Acceptable bag width	80mm-210mm
Acceptable bag length	80mm-280mm
Bag type	4 side sealing machine
Sealing method	Heat sealing
Bag material	PP,PE,PVC,PS,EVA,PET,PVDC+PVC,OPP+CPP and others
Power	3P AC 380v/ 50Hz/60HZ 1.9KW
Air request	0.8m3/min
Weight	750kg
Dimensions	1770x1300x2126mm
