

Self Adhesive Bottle Sticker Labeling Machine PASAL-240

The Automatic Vertical Sticker Labeling Machine PASAL-240 is one of the most users friendly. The self adhesive sticker labeling machine is used for full/partial wrap around labeling on different size of round containers. It is capable of labeling up to 150 containers per minutes depending on products and label size. The automatic self adhesive sticker labeller model is equipped with roller spacing device resulting in a simple operation with “No change parts required”

Operation:

The round containers positioned on conveyor are released at equal distance by creating space between two containers with the help of roller spacing device. At the labeling point, an electronics product sensor senses container & releases a label from self adhesive label roll. If labelling machine is equipped with batch printing device (optional), batch printing device prints the batch no. & other matter on label while label is stationary between dispensing of two labels. The sensed round container moves on conveyor and picks the released label. Then the labeled container moves further through a rubber pressing belt & stationary rubber pad which ensures neat & perfect fixing of label on the container diameter.

Technical Specification:

Model		PASAL-240
Direction of Movement		Left to Right
Output/Hour*		5000 to 1200 Nos.
Electrical Specification**	Conveyor Motor	0.25 HP, 415 Volts, 50 Hz
	Pressing device Motor	0.25 HP, 220 Volts, 50 Hz
	Sticker Roll Stepper Motor	6V DC
Height of Conveyor**		860 mm to 910 mm
Bottle Sticker Labeling Machine Dimensions**		1835 mm (L) x 600 mm (W) x 1450 mm (H)
Case Dimensions		2050 mm (L) x 800 mm (W) x 1650 mm (H)
Net Weight		350 Kgs.
Gross Weight		600 Kgs.
