

CD-500 Automatic Blister Packing Machine

CD Series Automatic Blister Packing Machine is an All in one automatic card blister packaging system (Form/Cut blister form/Product feed/Card supply/Seal) designed to meet a wide variety of packaging applications with high efficiency at economical price.

Just in time blister forming eliminates pre-form blister inventory. The plastic forms are placed in a die which is 28 pieces (can be less or more) consisted a crawler-type circle. Thus the machine can perform fast and steadily.

On the sealing station, we use our unique type to make each pack sealed 2 times. The sealing will be much firmer than the type of sealing 1 time. The automatic blister packing machine has installed the clutch to shut down the machine when any fault. So the machine never muddle up in production.

Application of the blister packing machine:

It is suit for daily use, stationery, minor hardware, cosmetics, medicines, as well as battery, toothbrush, pens, glues, plug base, bearing, etc. to improve the grade of the finished products.

Technical specifications:

- Forming area: 440×180 mm Can be customized
- Forming depth: 45 mm
- Output: 20 cycles/min.
