

Gravity Bottle Filler

Our automatic linear structure gravity bottle filler drinking water bottle filling machine is an atmospheric filling machine. Under the control of PLC and touch screen, there is no need to replace any components, the operation is simple, and the bottle replacement is convenient. By controlling the filling time, we can change the filling volume according to different bottles and requirements. The whole machine adopts advanced stainless steel and anti-corrosion materials. It is suitable for filling requirements of bottles (containers) of various shapes and other containers except carbonated liquids.

Description

Rito machinery company's gravity bottle filler adopts filling valve gravity filling, equipped with PLC and touch screen.

Machine Parameters:

Heads No.	8	12	16	20
Capacity(BPH)	500ml: ≤2000	500ml: ≤2800	500ml: ≤3400	500ml: ≤4000
Volume	50-1000ml			
Accuracy	≤1000ml: ±2ml; 100-500ml: ±1ml; ≤100m: ≤1ml			
Suitable Bottles	Height: 100-280mm, Diameter: Φ30-110mm			
Control method	Touch screen and PLC			
Air supply	0.5-0.7Mpa			
Voltage	220V/110V, Single phase , 50/60Hz, customized globally
