

## *CapperPacks Automatic Cap Sealing Machine*

The CapperPacks Automatic Cap Sealing Machine is mainly suitable for sealing the dust-proof plastic caps of round bottles of various PET plastic, iron, aluminum and paper cans. It features advanced design, reasonable structure and simple operation.

The necessary and ideal packaging equipment for the industry. It's easy to form an automatic assembly line with filling system, weighing filling system or labeling system and can be customized according to customer product requirements. Optional automatic bottle unscrambler, filling machine, can sealing machine, labeling machine, etc.

### **Technical Parameter**

- Machine material | · stainless steel 304
- Operation interface | touch screen
- Gland speed | 30-50 pcs/min
- Applicable height | 60-200mm
- Applicable bottle diameter | 35-100mm
- Operating temperature | 0-45°C
- Operating humidity | 35-85%
- Dimension (L\*W\*H) | 2000×1000×1800mm
- Voltage | AC220/380V 50Hz~60Hz
- Total power | 440W
- Machine weight | 150kg
- Air pressure | 0.4-0.8MPa
- Rate of flow | 0.15cube/min
