

ZHYZ-80A Soft Tube Filling Sealing Machine

Our high speed filling machine can complete tube filling and sealing, which is much more effective than other filling equipment. The ZHYZ-80A tube sealer is suitable for all kinds of plastic tubes, composite tubes and metal tubes. The filling accuracy is lower than ±1% and the production capacity is 60 to 100 units per minute, which means 3600 to 6000 units per hour. Thus, it is very productive.

Features

- 1. ZHYZ-80A high speed filling machine adopts Siemens PLC system, Swiss LEISTER air heater and AIRTAC pneumatic components.
- 2. With this machine, filling, sealing and batch printing can be completed automatically.
- 3. Our tube sealer uses mechanical driving type filling system, making sure the stability of filling volume.
- 4. To assure a favorable sealing effect, high speed filling machine applies hot air sealing inside the tube and cold water cooling outside the tube.
- 5. The elastic tight tube cup ensures end capping height same.
- 6. Through air blower, the harmful gas can be emitted to the outside.
- 7. ZHYZ0-80A high speed filling machine is also installed with such devices as fault alarming, door opening and overload protection.
- 8. With visible stainless steel outline border, the working process can be observed. The human-computer interface is used to display and control.
- 9. Tube inside has automatic cleaning and dust recycling device to keep it clean all the time.

- 10. After sealing, high speed filling machine cooling system can help avoid heat from contacting cream.
- 11. Such tube sealer enjoys functions of automatic tube loading, internal tube cleaning, positioning and sealing.
- 12. Besides, users can choose American BANNER ultrasonic level detection probe and Siemens modules to achieve accurate control of materials.

Parameters of ZHYZ-80A High Speed Filling Machine

Filling Volume (ml)	Metal 1-150ml, Plastic 1-250ml
Filling Accuracy	= ±1?
Capacity (unit/hour)	3600-6000 (Adjustable)
Tube Diameter (mm)	Metal F10-35, Plastic F10-60
Tube Length (mm)	50-240
Hopper Volume (L)	40L
Power of Tube Sealer (V)	380V/220V (Optional)
Air Pressure (MPa)	0.4-0.6
Equipped Motor (Kw)	2.2
