

## XT-380 Type Semi-automatic 3D Overwrapping Machine

The machine is elaborately designed and modified by absorbing the foreign advanced equipments, the automatic feeding, film-cutting, box-pushing, film fold-up on both sizes and heat-seal of products could be wrapped with a good appearance. This machine has the features of high performance and neat & perfection seal up, therefore the products packed through such machine has the function of anti-damp and anti-dust. With compact structure, simple operation and convenient maintenance changing a few components to conduct the package of different sizes of products. Such as medicine, cosmetics, health products, foods and so on.

### Product Application:

This machine is vastly used as the 3D overwrapping of various square single articles in pharmaceuticals, healthy products and food sectors.

### Main Technical Parameters:

Boundary dimension (mm)	1720(L)×660(W)×1070(H)
Packaging dimension(mm)	(L)40-220×(W) (can be adjustable) ×(H)20-90
Packaging speed	6-25 (cases) (min)
Air consumption	18-35 L/Min
Total power	0.1 KW
Voltage	220 V/50Hz
Weight(about)	150 kg
