

ZHJ-200 Automatic Cartoning Machine

This machine is suitable for packaging into cartons of blisters with tablets, tubes, vials and the like. Max packing speed will reach 200 cartons / min. There is a high efficiency and good quality packaging. The machine automatically completes the installation instructions, the opening of the paper box, packing in cardboard boxes, printing article, sealing, etc. Frequency control is used with the control panel with the interface "man - machine" PLC. It is controlled by the various parts of the photoelectric monitoring. If an abnormal situation arises in the work, the machine stops working, and the reason is displayed automatically. It is very convenient for timely corrective action. This machine works by itself and in conjunction with other equipment.

Main technical parameters:

Model	ZHJ-200D
Production capacity (box/min)	80-200
Max.size of box(mm) (L×W×H)	200×70×60
Min.size of box(mm) (L×W×H)	75×25×15
Specification of box	250-300g/m ²
Max.size of leaflet(mm) (L×W×H)	260×190mm
Min.size of leaflet(mm) (L×W×H)	100×100mm
Specification of leaflet	55-65g/m ²
Volume of air consumption	20m ³ /h(pressure 0.50—0.7MPa)
Power of motor (kw)	2.2kw
Power supply	380V 50HZ
Overall Dimension(L×H×W)	4380 ×1460 ×1800mm
Weight (kg)	2500
