

Three-dimensional Packaging Machine

This machine is widely used in medicines, health products (condoms), cosmetics, tea, food, cigarette holders, electronic cigarettes, playing cards (both inside and outside), stationery (such as erasers, notice stickers, etc.), audio and video products and other industries. Automatic packaging of box-type items. It can play the role of moisture-proof, dust-proof and anti-counterfeiting, and also help to improve the packaging grade of the product and increase the added value of the product.

Product description

1. The machine integrated with electrical, pneumatic, mechanical, working stable and reliable, three cams design is the newest innovative and had patent and CE approved.
2. Quality product with imported components. And all frame are made by SS 304.
3. Uses inverter to control the speed, so could adjust according to the operation need.
4. The mould change easy, without dismantle drive chain, hopper. save time greatly.
5. New type double safeguard construction, won't broke machine parts for any incident.
6. One way hand wheel prevent from backward operation, and protect worker's safety when the machine operates for still hand wheel.
7. New type dual cutting knife replace traditional single knife, so could use for very long time.

Technical Parameters:

Packing speed	30-120 boxes/minute
Packaging Materials	BOPP heat-sealing film and anti-counterfeiting cable
Package dimensions	L40-180 W20-95 H10-45(mm)
Maximum packaging film size	300x200(mm)
Equipment size	L1800 x W850 x H1500(mm)
Equipment weight (approximately)	400Kg
Motor Power	0.75Kw
Electric heating power	3.2Kw
Voltage	220V、380V/50Hz
