

Honey Packing Machines VT-25-PF

Honey Packing Machines are made by Vista Techno Pack Machine company situated in Mumbai. They provide complete solutions for packaging liquid products especially honey and come at a price of three point five lacs. The capacity of the machine is two hundred grams to two kg. The machine comes in both automatic and semi-automatic mode. Each machine offers exact filling support as well as easier handling of operations. The machine uses advanced technology to avoid using the adjustment level. The Honey Packing Machines work on the volumetric principle with diving nozzles. The machine has a stainless steel body with a matt finish. The salient feature of the machine is that no bottle means no filling, elegant and easy control panel and vibration free for trouble-free performance. It also has a drip tray under the conveyor.

Product Details:

Model	VT-25-PF
Usage/Application	Honey Pouch Packaging Machine
Machine Capacity	40ppm
Driven Type	Electric
Packaging Type	Pouch
Automatic Grade	Semi-Automatic, Automatic
Power(KW)	01.май
Condition	New
