

## ZH-LFM500 Automatic Plastic Lid Making Machine

It is used for forming the plastic material as BOPS, HIPS, PS, PVC, PET and so on, which is widely used for the mini-type soup spoon, the cover of the dish such as the salver of medicine and coffee, the bottleneck of Coca-cola.....

### Technical Parameter

|                                |                 |
|--------------------------------|-----------------|
| Max. Forming Area              | 470×150mm       |
| Max. Froming Depth             | 50mm            |
| Thickness range of sheet       | 0.15-0.35mm     |
| Max. sheet roller diameter     | 460mm           |
| Max. Rewinding diameter        | 460mm           |
| The power of heater            | 1.5kw           |
| Motor Power                    | 2.2kw           |
| Air Pressure                   | 0.5Mpa          |
| Punching Frequency             | 15-35times/min  |
| Total Power of Electric Source | 380V 50Hz 3.0kw |
| Weight                         | 1200kg          |
| Dimensions(L×W×H)              | 2500×900×1600mm |
