

Horizontal Continuous Flow Wrapper Pillow Bag Bars Packing Machine

Suitable for bread, moon cake, cake, paper box and tray and solid material package.

Main feature:

1. Stainless steel machine body, elegant appearance and durable
2. The bag length without human setting, can be automatically detected during machine operation and set automatically
3. Simple machine structure of servo motor, easy maintain, less wear and long lifetime
4. The main control circuit adopt single machine control, display on the touch screen, servo motor control, superior human interface, easy operation, and clear at a glance
5. Packing speed and the length of forming bag can be controlled by servo motor, stepless speed, widen the adjustment range, can well match to the front part processing line
6. High sensitivity photocell tracked accurately automatically
7. Sealing temperature independent control, suitable for many packing material, firm and elegant sealing
8. Can equip with Intermittent Pneumatic Devices and spraying alcohol device

Main technical parameter:

Packing speed	30-200 bags/min
Bag length	L :130-400MM W:50-160MM H:3-70MM
Film width	80-350mm
Packing material	OPP/CPP, PT/TE, KOP/CPP, ALU-FOL
Outer size	L 4000*W 950 *H1600MM
Heating power	3.5kw
Power	0.55+0.75kw
Total power	4.8kw
Machine weight	630kg
Optical device	ribbon printer, flushing device, bread falling feeder, stacking machine, guide bar, hair removing and gusset device
