

Automatic Film Shrink Packaging Machine For Bottles / Cans

Wapper Around Packer is mainly used for beverage, beer, food and medical industry for glass bottles, PET bottles and zip-top cans packaging.

Competitive Advantage:

1. Applying imported PLC procedure automatic control, stable performance, and accurate control.
2. Enjoying full-automatic function of feeding, tube management, shrinkage, and cooling shape fixing flow.
3. Film transportation is adopted with sensor switch control, adjustable deliver film length, and can reduce wastage.
4. Elect motor is adopted with imported transducer to control, realizing unlimited speed regulating.
5. Advanced spiral wind circulating structure, three-layer insulation treatment, and energy conservation.
6. Reinforced cooling shape fixing channel to ensure packaging products shape quickly and convenient storage and transportation.
7. Bottle entering, Automatic unscrambling bottle, Pushing bottle, Heat sealing, Saw cutting, Pressing PE, Shrink, Cooling.
8. This machine applies air stirring mechanism in pushing bottle and hot sealing, cool cutting. It uses flat silk pulse seal, the saw tooth knife cuts, The unique heat sealing, cool cutting mechanism, has guaranteed the packing agglutination, reliable, and artistic.
9. Automatic unscrambling bottle's appliance makes bottle changing more quickly and conveniently.

Specifications:

Supply Capacity	7-30packs/min
Voltage	220/380V
Automatic Grade	Automatic
After-sales Service Provided	Engineers available to service machinery overseas
