

## Cashew Nut Vacuum Packing Machine LGDZD-400

We are a Chinese company developing cashew nut vacuum packing machine. The company introduced the new machine to the market on the basis of continuous improvement of technology-vacuum packing machine dz 400. Many aspects of production and life can be used by our machines. The compact design makes the machine smaller and the advanced technology makes the operation of the machine easier.

Based on our years of production experience, this is more reasonable in cashew vacuum packing machine design and cashew nut vacuum packing machine price, and sell well in the market. The machine has been sold well at home and abroad, and has been well received by customers at home and abroad. This machine adopts vacuum packaging structure, making the product packaging more convenient, cleaner and hygienic, more suitable for sales. The parts of the machine are all imported parts, which can effectively ensure the service life of the machine and the low failure rate of the machine.

### Technical Character

1. The lid of cashew vacuum packing machine is equipped with special hinge, the staff can open the machine easily with the help of hinge, saving labor. On the basis of the obvious reduction of the operator's labor intensity, so that they can easily complete the production task.
2. Control system. The machine uses PC control panel, this control system is advanced and efficient, can provide a variety of control modes for users.
3. Major structural materials. The main material of cashew vacuum packing machine is 304 stainless steel, which makes the machine easier to clean, and can guarantee the clean and hygienic of the machine for a long time, making the machine suitable for packaging food-grade raw materials and meeting the national health and safety standards
4. Customization. In order to make cashew nut vacuum packing machine better able to package products, some Settings of the machine can be customized according to customer requirements.

5. High quality cover washer: High quality cover washer is made of high density materials. The v-shaped vacuum chamber cover seal ensures efficient sealing performance in daily work. Moreover, the compression and abrasion resistance of the material lengthens the service life of the cover washer, reduces the wear of the machine, and makes the service life of the machine longer.
6. Low price. After continuous improvement and innovation, the machine price is more favorable on the basis of better quality.

**Technical Data:**

<b>Model</b>	<b>LGDZD-400</b>
Power	220v/380v 50Hz 0.75KW
Vacuum Chamber Size	400*330*110mm
Packing Speed	1-4pcs/min
Sealing Length	400*10mm
Dimension	485*540*940mm
Machine weight	85kg
Bag Material	Vacuum Use bag, Aluminum foil bag
