

FF-T10 Tea Vacuum Packaging Machine

The FF-T10 floor type tea vacuum packaging machine is suitable for various small products vacuum packing such as tea, nuts, preserved fruit, small electrical components etc. The tea vacuum packaging machine whole process is automatically controlled by the vacuum machine. Extraction, sealing, cooling time is adjustable, with digital display every movement of the time, easy to operate. Packing about 10 seconds one time.

The tea vacuum packaging machine uses plastic composite film or plastic aluminum foil composite film as packaging materials for various instruments, medicines, food, fruits, pickles, preserved fruits, aquatic products, native products, chemical raw materials, electronic components and military supplies. Whether it is solid, powder, paste or liquid, it can be vacuum heat-sealed and packaged. Due to the high vacuum in the bag, it can effectively prevent the corruption and deterioration of the goods caused by the oxidation of lipids and the reproduction of aerobic bacteria to achieve quality preservation, Preservation, taste preservation, color preservation function, extend the storage period of products (commodities), at the same time, for some soft items, after vacuum packaging, the packaging volume is reduced, which is convenient for transportation and storage.

Technology data sheet:

Model	FF-T10 tea vacuum packaging machine
Packing Specification (g)	3-10
Packing Error (g)	± 0.5
Voltage(V)	AC 220 /50
Air Pump	15L/min
Power (W)	500
Chamber Material	304 Stainless Steel
Machine Size(L*W*H)(mm)	725*600*1105
Speed (bags/minute)	22-55
Net.Weight (KGS)	180
