

GFEPZLQ-6 Automatic Explosion-proof Alcohol Filling Machine

GFEPZLQ-6 automatic straight line explosion-proof self-flow filling, the machine is a 6-head automatic quantitative explosion-proof liquid linear filling machine. Suitable for round and various shapes of glass bottles and plastic bottles of liquid filling machine. Can be filled with medical alcohol, gasoline additives and other flammable non - viscous liquid. The machine adopts PLC explosion-proof touch screen control, stable operation and convenient maintenance. After the replacement of a small number of parts and the appropriate corresponding adjustment, can be different height and different diameter of glass bottles and plastic bottles for filling, high versatility, wide range of application.

Machine characteristics:

Used for filling highly inflammable goods, the whole machine is equipped with explosion-proof electrical parts, including: explosion-proof motor, explosion-proof solenoid valve, explosion-proof electric cabinet, etc.

Parameters:

1. Product model name: GFEPZLQ-6 automatic quantitative liquid linear filling machine
2. Production capacity: 600 bottles/hour -1200 bottles/hour
3. Apply to the bottle diameter range: Φ 65 - Φ 165 mm or bottles of 65-140 mm
4. Applicable bottle height range: 180-430mm
5. Host power: 1.5kw
6. Speed regulation form: frequency conversion speed regulation
7. Power supply voltage: 380v / 220V / 415V / 240V
8. Air source: 0.4-0.8mpa 0.1m³ / min
9. Overall dimensions of the main engine: 2400mm×1200mm×2400mm
10. Trim weight: 800kg
