

Link-620ZK-2CZ Automatic Vacuum Packing Machine

Performance and features:

1. The machine can realize automatic metering – automatic bag-making – automatic vacuuming – automatic sealing – finished product, specialized in the customized development of defoaming master batch.
2. One equipment can provide packing capacity for 2-3 defaming master batch production lines, saving at least 1-2 workers.
3. For defoaming agent of different density, the length and vacuum degree of the bag can be adjusted, which is convenient for stacking and shaping transportation.
4. Its defoaming master batch production has a certain temperature, coupled with the workshop environment and other reasons, can save labor costs for enterprises.

Technical Parameters:

Model	Link-620ZK-2CZ
Blanking way	Single bucket measuring cup, electronic scale
The bag type	Back seal pillow bag
Measuring range	5Kg
Bag-making size (customizable)	L 400mm, W 290mm, back sealing edge 15mm
Packing speed	6-8 package/min
Power	5.8 KW
The power supply	3Φ 380V or 220V 50HZ
Chassis appearance	Stainless steel
The weight of the	280KG
Size	L 3100 W 1650 H 4600 mm
Vacuum	0 – 100 kpa
Vacuum flow	63 Cubic meters/ hour
