

XS-BG Automatic giving bags packing Machine

Capability and Characteristic :

Applied to milk powder, protein powder, coffee, yeast, white sugar, soft white sugar, glucose, monosodium glutamate, solid beverage, powder, granular additive, solid medicine, toner, powder, dyes, flavors and fragrances, veterinary drugs, pesticides, washing powder such as powder, granular product packaging.

Function and Characteristics:

- 1) Check bags - Print Date - openings - filling, Tap - heat seal - plastic, the output product.
- 2) The use of man-machine interface console, the whole process of automation and control. Imported PLC, the implementation of the import components, work stable and reliable, simple to maintain.
- 3) Host imported frequency converter speed control.
- 4) Sealing in order to avoid wrinkling, plastic design of the local special position, so that no fold seal formation.
- 5) The body spray uses advanced technology, components and material selection of imports of stainless steel contact materials, high hygiene standards, and anti-corrosion, long service life of equipment.
- 6) Automatically detects the device, no bags - no filler - no sealing, the bag could not be opened or open does not complete - not filled - no sealing; heating device failure alarm; machine set lower than the pressure in the automatic shutdown to ensure that the quality seal.

Technical Parameters:

Model	XS-BG
Packaging material	Portable bag, Hand luggage, Zipper bag, edging bag 4 sides, edging bag 3 sides, paper bag
Size of bag	W:100-210mm L:350mm
Filling Scope	5-1500g
Packing rate	≤30bags/min
Packing accuracy	With an error≤±1%
Total Power	3.6kw
Total volume	1800×1600×2200mm
