

Automatic Peanut Coating Machine GGF-11

Peanut coating machine is equipped with stepless speed regulating device, so this machine is suitable for many kinds of granular food processing, special equipment hollow bean beans, fishskin peanuts, flour coated peanuts and various foods coating sugar, flour, forming. The device can also be used to make tangyuan, so also known as tangyuan machine. This machine is often used in coated peanuts production line.

This peanut coating machine has smooth rotation, low noise, no pollution, etc. Widely used in snack food processing industry, necessary equipment for making many kinds of peanuts

Technical Parameters:

Model	GGF-11
Power	1.1-1.5 kw
Voltage	380 v
Capacity	30-50 kg/time
Weight	90 kg
Dimension	1360*800*1200mm
