

Automatic Rotary Capping Machine YQXG-80

Suitable for the cap screwing of different shapes of bottles in the industries of foodstuff, pharmaceuticals, daily chemical, pesticide and cosmetics etc.

Specifications

- The machine is easy and intuitive.
- Frequency control, production speed adjustable, automatic counting.
- All electrical components are famous brand.
- Simple structure, stable performance and easy maintenance.
- Outer surface of USU304 stainless steel, full compliance with GMP requirements.

Technical Parameters:

Power supply	AC220V / 50Hz
Power	1500 W
Cap Diameter	10~100mm
Capping speed	30-100bottles/min
Suitable bottle height	50~280mm
Air sauce pressure	0.5MPa
Net Weight	500kg
Package size	2050×1000×2100mm
