

SB-800W Flow Wrap Machine

This machine is designed on basis of multi-function pillow packing machine and is suitable for packing warm cooling gel and similar product packaging design and development of products of domestic initiation.

This machine sets the bag, pack the product, prints the batch number, four side seals, easy open, cuts off and the packing finished product transportation all completes in one time. The machine adopts man-machine interface, with about automatic correction, before and after the photoelectric version, six groups of temperature control, sealing pressure device to ensure product sealing effect.

Technical Data

Model	SB800W
The.film width	300-500mm
Max packaging capacity(according to its material to fix)	80-160 p/min
Length of bags	100-200mm
Product size	Max width 200mm, max height:20mm
Packaging height	5-40mm
Intensity of Sealing	≥15
Total power	380v 50hz 4.8kw
Overall dimensions(L x W x H)	4600x1775x1505mm
Weight	1000kg
