

Vacuum Can Sealing Machine GT4B18

Filling and sealing machine the GT4B18 can sealing machine adopts a four-trolley dual-rolled sealing mechanism. It is suitable for sealing around cans of small specifications. The machine has such features as convenient assembly and disassembly of parts, simple maintenance, and convenient operation. The control parts adopt advanced electric and pneumatic control technology. With convenient speed adjustment and high cover dropping accuracy, it is a preferred machine for canning factories and beverage plants. Through steam jetting, the machine can achieve a vacuum degree that meets the requirements.

Technical Parameters

MODEL	GT4B18
THE NUMBER OF CAPPING HEAD	4
PRODUCTION CAPACITY	100-200CANS/MIN
CAN DIAMETER	Φ52MM~Φ105MM
CAN HEIGHT	39MM~133MM
STEAM JET VACUUM	-0.025~-0.05MPA
POWER	3KW(VARIABLE FREQUENCY SPEED REGULATION)
DIMENSION	1600×2400×2000MM
WEIGHT	2.5T
