

Double eye drop filling-capping machine HHGNX-II

Used for filling 2-30ml circular plastic bottles or glass bottles and other material types of eye drops.

Composed of high precision cam provides a complete wheel, positioning, plug, cover, lifting cosine acceleration of cam drive mechanism to complete the capping head; adopts constant torque capping head screw cap; the peristaltic pump filling or ceramic pump metering filling; touch-screen computer controlled. With the unique function of no bottle filling, no internal plug and no inner plug, optional RABS.

Features:

- Positioning is accurate, transmission is smooth;
- Adopts constant torque capping head cap, automatic sliding device, not to hurt the bottle cap;
- Simple adjustment and measurement, accurate filling precision, simple operation.

Technical Parameters:

Bottles appliacbility	2-30ml Bottles of different specifications
Outout	<<70 bottles / minute (depending on the size of the bottle)
Power source	220V 50Hz
Air wastage	5m³/h, 0.5-0.6MPa
Power	1kw
Weight	600kg
Overall size	2000 x 1400 x 1600mm
