

## *XW8200 Reciprocating Flow Packing Machine*

XW8200 is a flow packing machine using reciprocating end sealing and cutting technology. The machine has a simple design, stable operation, and high precision, and is suitable for various types of products.

XW8200 reciprocating flow packing machine with high speed, high precision, high stability characteristics, the use of touch screen makes the operation more simple and intuitive, optimized operating height, and equipped with a transparent safety shield to provide noise protection, so that in the production process to have good visibility of the product, but also to meet the high standards of safety strict requirements. The design meets the specific requirements of the Good Manufacturing Practice (GMP) for hygiene, line headroom and validation.

### **Product Features**

- Maximum capacity of 200 packs/min
- Reciprocating end sealing and cutting
- Four-axis servo control
- PID automatic temperature control system
- PLC control system and Siemens TP900 (9 inches) HMI screen
- Two-axis film supply and automatic film splicing without stopping
- GMP compliant design

Technical Data

Project		Parameter
Capacity		30-200 packs/min
Width of Packing Film		80-350 mm
Dimension of Package	Length	65-180 mm
	Width	30-110 mm
	Height	5-40 mm
Power		8 kW
Power Three-Phase Five-Wire		380V/50Hz
