

UT1AFG3 Automatic Can Sealer Machine for Canned Frozen Dried Food

This machine is applicable for sealing various round cans including PET plastic bottles, tinplate cans, aluminum cans, paper cans, and etc. It has advanced design, reasonable structure and easy operation, which is the necessary and ideal packaging equipment for food, medicine, tea and chemical industries. With domestic patented design sealing roller structure, its stable speed can reach up to 60 cans per minute with lower power consumption.

Features

- Production capacity: with our new design sealing head, it could reach up to 65 cans/min, while other single head can seamer just reach up to 50 cans/min by using higher power motors.
- Save energy: save 30% energy to reach same productivity than before. For example, if it need to run at 40 cans/min, the frequency rate is 56Hz on old version, while it just 32Hz on this new one.
- Automatic Can Sealer Machine for Canned Frozen Dried Food adopts servo motor driven with simple structure, stable operation and low noise characteristics.
- Turntable automatic reset positioning after initiating;
- Auto stop and alarm function in case of cans sticking within the turntable, to effectively prevent mechanical structure damage
- One-button reset function for turntable positioning after taking out the cans
- Easy changing mould function: replace the turntable and the sealing position can be automatically memorized with one-button setting, so as to eliminate manual adjustment on the screws for different position.
- Production capacity of 35-65 cans/min and easy to be connected with other machines for packing line.

- Sealing chuck head and sealing rollers are made with 440C stainless steel material and go through vacuum quenching tempering heat treatment to ensure high hardness and durability.
- Can Body does not rotating with good sealing performance.
- Suitable for a variety of cans including plastic cans, tinplate cans, aluminum cans, paper cans, and etc and widely applicable in food, beverage, and pharmaceutical industries.

Parameter

Function	tin canning, can seaming, tin seamer, can sealing, can sealer
Sealing rollers	4(2 first rollers/2 second rollers)
Sealing Speed	35-65cans/min
Sealing Height	40-200mm (adjustable)
Sealing Diameter	50-100mm (8 station)/ 101-153mm (6 station)
Voltage	220V,50/60Hz
Power	1.7KW
Weight	300KG
Dimension	1800*900*1450mm (L*W*H)
