

DZQ-500 Vertical Vacuum Food Sealing Machine

The table top vacuum packing machine is mainly used for sealing composite film packaging materials. This machine has two 500mm sealing strips and a high-strength vacuum pump. It is highly suitable for use in food processing stores, fruit stores, pizza shops and small commodity stores, etc

Product Description

Advantage

- This table top vacuum packing machine is a vertical vacuum sealing machine. It is equipped with casters at the bottom for easy movement and simple operation.
- It features a 20m³ vacuum pump, providing greater suction power.
- This industrial vacuum packing machine has an optional inflation function. The product can be better preserved by adding inert gas to the packaging bag
- There is a dedicated electrical box inside the machine to protect the electrical and mechanical equipment, thereby extending the service life of the machine
- Most of the machine's components are made of stainless steel.
- It is equipped with two sealing strips, allowing both sides to seal simultaneously and accommodating two rows of products at once.

Description

The vertical vacuum packaging machine is an innovative and efficient machine. Its vertical design ensures that the machine's volume is minimized to the greatest extent without affecting performance, making it suitable for small-scale sites and large-scale operations. This machine is highly suitable for food packaging, such as meat, seafood, biscuits, pastries, pizza, pharmaceuticals, electronics and chemicals.

Technical Parameters

Model	DZQ-500
Voltage	110/220V 50-60Hz
Pump Power	0.9kw
Pump Capacity	20m ³ /h
Sealing Length	500mm (x2)
Sealing Width	10mm
Chamber Size	530x530x75mm
Dimension	585x650x970mm
Weight	≈105kgs
Certification	CE ISO
