

SED-100FG Water Bottle Filling And Capping Machine

The product is mainly designed to all kinds of PET plastic, iron, aluminum and paper cans and other round-bottle sealing applications. With an advanced design, reasonable structure and easy operation, it is the ideal packaging equipment in food, pharmaceutical, tea and chemical industries.

1. The can is designed as not rotating during the sealing process which will provide better protection to the product inside cans.
2. The operation panel design reasonably simple, easy adjustment and maintenance
3. The whole was made of stainless steel material, SS304 sealing roller, have good sealing performance, meet the requirement of most standard workshop design requirements
4. It automatically feed caps down when detected it, safe and reasonable electric control design
5. Cutter and turret raise and down by mechanical cam control, stable and reliable
6. For a variety of tin cans, aluminum cans, paper, cans, and other specifications circular sealing cans, easy to learn, is the ideal equipment for the food, beverage, pharmaceutical and other industries

Advantages

1. Use screw measurement for powder type materials, with screw feeder to achieve feeding, metering.
2. High precision, high quality, high speed and long life.
3. Easy to operate and easy to clean.
4. Be made of stainless steel, good shape and nice appearance.

Product Parameters

Material	Stainless Steel
Sealing speed	15- 20 cans / min
Sealing adjustable height	50-200mm
Total Power	0.31KW
Suitable can dia :	50-120mm (can use more than one DIA by changing module)
Voltage:	220V/380V
Air pressure	0.5MPa
Weight:	300KG
Size:	1500(L)*800(W)*1500(H)mm (1.5m conveyor)
