

Semi Automatic Screw Cap Sealing Machine

The semi automatic cap sealing machine is precision built on sturdy welded steel frame completely enclose in stainless steel sheet and doors are provided to facilitate the servicing of machine.

Operation:

Require manually feeding & unloading container, where the body and the neck of the container are positioned below the rotating head and sealing head is performing perfect operation of sealing.

Technical Specifications:

Output/Hour*	1000 to 2400 Containers.
No. of sealing head	1 Nos.
Electrical Motor**	1 HP / 440 Volts / 3 Phase / 50 Hz (Four wire) For Main Machine.

* Depends on bottle size, cap size and type of cap. ** We can supply as per customer requirements.

Salient Features:

- The unit is made compact & versatile.
- S.S. Elegantly Matt Finished Body.
- Built in front control panel.
- Quick setting.
- Motorised head movement.
- No change parts require for different container diameter.
- Low noise level, low power consumptions.
- Adjustable bottle height gauge for easy and quick setting.
- SS cladding or hard chrome plating of all exposed parts to ensure long life and resistance against corrosion.
- Sealing pressure can be varied to suit different gauges and size of caps.
-
