

## YZL-I Count Packing Bottling

Description: This machine mainly used for plastic bottles automatic collation, orientation and distribution, a variety of plastic bottles filling line of matched products. It can be widely used in pharmaceutical, chemical, food and beverage industry.

### Working principle

The chaotic Plastic bottles will be (without cap) into the bottle-deposit warehouses, settled in special institutions, the bottle up so that the plastic bottles with automatic transmission and orderly place to work cleaning bottles, and completed 360 ° shift, the one with the font under the road on the conveyor belt for filling processes.

### Technical Characteristics:

1. The bottles of the body settled oriented and used practical, reliable action.
2. A large amount of bottle-deposit and high efficiency.
3. Wide adaptability, easy adjustment.
4. Equipped with a dust clean-up and hot air drying device.
5. Sealing well, selected material reasonable, in line with the GMP requirements

### Technical Parameter:

1. Output: 50-100 bottles/min
2. The diameter of the bottled:  $\varnothing$  10-  $\varnothing$  100mm
3. The high of the bottle: 30-150mm
4. Voltage of power source: AC three-phase 380V
5. Total power: 0.3kw
6. Pressure: 0.4MPa Air consumption 0.2m<sup>3</sup>/min clean air
7. Overall dimensions: 1500×1800×1000mm (L×W×H)
8. Whole weight: 250kg
