

JAT-Y60 Circular Bucket Spiral Vibrating Feeding Machine

The hopper wall thickness 1.5mm frame material 304 stainless steel screw barrel pipe diameter optimization 102 sanitary pipe, tube feeding screw increase polishing process, full welding polishing, blade thickness of 2mm, feeding speed, no dust flying, a vibration device, to prevent the powder accumulation, to ensure smooth material. Vibration feeder selection of listed brand in Zhejiang, "Wolong", RV reducer transmission efficiency, stable operation, long service life, high bearing capacity, "U" type pipe on the feeder tube cover can easily be segmented opening, screw segment disassembly, convenient cleaning equipment, installation.

Product Parameters:

Model	JAT-Y60
To capacity volume	1M ³ /h
Hopper volume	60ML
Feeding diameter	Φ89
Lifting height(standard)	1.7M
Power	380V 0.8KW
The whole weight	60kg
Hopper volume	(L)580× (W) 580× (H) 800mm
Lift the angle	45° (can be customized 30°-60°)
